The sound quality is comparable to the best disk-based and cassette-based systems. FS-1 is the first compact digital audio recorder that also serves as an interface. A keyboard or touch screen can be used to record, as well as play back, the audio tracks. It provides quality audio performance from a compact unit. The ZC1 Digital Audio Interface is based on our award-winning product line of SoundScape series Digital Audio I/O. The interface allows high performance digital audio data transfer between a number of devices. It has a serial port that allows data transfer to standard external DACs. The SoundScape Soundsticks, named for their flat form factor, are small and easy to use. Soundsticks, like the SoundSticks DX, have a very flexible jack input. These Soundsticks can be driven by a computer, a digital mixer or any other device that can accept analog or digital signals. The Soundsticks are incredibly easy to use. Simply connect the Soundsticks to any audio source, like a computer, and touch the button on the Soundstick to start playback. The front panel and control buttons are intuitive and easy to understand. The SoundScape Soundstick™ is a small and easy to use analog/digital interface. The Soundsticks have a very flexible jack input that can drive any standard stereo system, or audio source. They also have a flexible control panel and are very easy to use. DS-1 is a high performance, easy to use, USB interface for Mac® and Windows®. DS-1 allows users to connect and control any audio source using a computer. It is loaded with advanced features and can operate as a USB device or as a system component. The best audio performance. With the ZC1, Yamaha creates the most advanced analog/digital interface for computer and mobile audio applications. The interface includes 2 independent analog and digital I/O channels, and a front panel that offers 12-bit resolution and up to 24-bit dynamic range. Product Features: 12-bit resolution 24-bit dynamic range Multiple operating modes: USB interface, USB device or system component USB audio interface DS-1 is a 82157476af
